das vorliegende handbuch bietet eine umfassende darstellung der vielfalt der in der schweiz bis in jüngste zeit mündlich und schriftlich verwendeten sprachen und dialekte und der räumlichen und sozialen bedingtheit ihres auftretens es bezieht sich nicht ausschliesslich auf die schweiz als viersprachiges land sondern geht neue wege indem es darüber hinaus das englische sowie sprachen berücksichtigt deren heutige präsenz in der schweiz auf migration beruht auch historische sprachen und dialekte die in der schweiz und im liechtensteinischen sprachraum gesprochen werden sowie die drei schweizer gebärdensprachen werden behandelt mit ausblicken über die schweiz hinaus bietet das handbuch eine erweiterte perspektive auf die räume die die sprachen der schweiz einnehmen so wird das traditionelle verständnis von vielsprachigkeit um neue aspekte und aktuelle entwicklungen ergänzt

a practical guide to teaching the way a child s brain learns best in this update of a bestselling classic

you will learn how to develop children s capacity and will to read each sequential chapter is practical eye opening and exactly what you need to engage young learners plan lessons partner with parents and align your prek 3 classrooms to the science of learning and the science of reading gain the latest insights on brain development from birth to age eight plus the skills to nourish it age by age and grade by grade what the latest neuroscientific research now says about oral language acquisition the evidence base for practices such as read alouds inventive spelling and sustained silent reading why vocabulary building must happen concurrently with phonological processing decoding fluency spelling and writing how to artfully combine explicit teaching of skills with playful multi sensory routines every day all aspects of memory are needed to develop successful readers when we engage children s brains and build our teaching practices around what we know about how the human brain makes meaning literacy learning makes more sense for children and for us

for years pundits have trumpeted the earthshattering changes that big data and smart networks will soon bring to our cities but what if cities have long been built for intelligence maybe for millennia in code and clay data and dirt shannon mattern advances the provocative argument that our urban spaces have been smart and mediated for thousands of years offering powerful new ways of thinking about our cities code and clay data and dirt goes far beyond the standard historical concepts of origins development revolutions and the accomplishments of an elite few mattern shows that in their architecture laws street layouts and civic knowledge and through technologies including the telephone telegraph radio printing writing and even the human voice cities have long negotiated a rich exchange between analog and digital code and clay data and dirt ether and ore mattern s vivid prose takes readers through a historically and geographically broad range of stories scenes and locations synthesizing a new narrative for our urban spaces taking media archaeology to the city s streets code and clay data and dirt reveals new ways to write our urban media and cultural histories

in the world today bilingualism is more common than monolingualism thus the default mental lexicon may in fact be the bilingual lexicon more than ever social and technological innovation have created a situation in which lexical knowledge may change dramatically throughout an individual s lifetime this book offers a new perspective for the understanding of these phenomena and their consequences for the representation of words in the mind and brain contributing authors are leaders in the field who provide a re analysis of key assumptions and a re focusing of research they bring new insights and new findings that advance the understanding of both bilingualism and the mental lexicon this volume serves to generate new directions and advances in bilingualism research

utopia in the anthropocene takes a cross disciplinary approach to analyse our current world problems identify the key resistance to change and take the reader step by step towards a more sustainable equitable and rewarding world it presents paradigm shifting models of economics political decision making business organization and leadership and community life these are supported by psychological evidence utopian literature and inspirational changes in history the anthropocene is in crisis because human activity is changing almost everything about life on this planet at an unparalleled pace climate change the environmental emergency economic inequality threats to democracy and peace and an onslaught of new technology these planetwide risks can seem too big to comprehend let alone manage

our reckless pursuit of infinite economic growth on a finite planet could even take us towards a global dystopia as an unprecedented frenzy of change grips the world the case for utopia is stronger than ever an effective change plan requires a bold imaginative vision practical goals and clarity around the psychological values necessary to bring about a transformation this book will be of great interest to students and scholars of the environmental humanities sustainability studies ecological economics organizational psychology politics utopian philosophy and literature and all who long for a better world

language development and the challenges it can present for individuals who are deaf or hard of hearing have long been a focus of research theory and practice in d deaf studies and deaf education over the past 150 years but most especially near the end of the 20th and beginning of the 21st century advances in the acquisition and development of language competencies and skills have been increasing rapidly this volume addresses many of those accomplishments as well as remaining challenges and new questions that have arisen from multiple perspectives theoretical linguistic social emotional neuro biological and socio cultural contributors comprise an international group of prominent scholars and practitioners from a variety of academic and clinical backgrounds the result is a volume that addresses in detail current knowledge emerging questions and innovative educational practice in a variety of contexts the volume takes on topics such as discussion of the transformation of efforts to identify a best language approach the sign versus speech debate to a stronger focus on individual strengths potentials and choices for selecting and even combining approaches the effects of language on other areas of development as well as effects from other domains on language itself and how neurological socio cognitive and linguistic bases of learning are leading to more specialized approaches to instruction that address the challenges that remain for deaf and hard of hearing individuals this volume both complements and extends the oxford handbook of deaf studies and deaf education volumes 1 and 2 going further into the unique challenges and demands for deaf or hard of hearing individuals than any other text and providing not only compilations of what is known but setting the course for investigating what is still to be learned
